# DANIEL CORNOCK
## FRONT END DEVELOPER

www.danielcornock.co.uk | github.com/danielcornock | daniel_cornock@hotmail.co.uk

## ABOUT ME

I am a front end developer that is extremely passionate about web development (both front-end and API work). I am currently expanding my skills using front-end frameworks both at work and home, and using NodeJS with TypeScript to build APIs for my personal project. Always looking to learn new things and explore new technologies. For a more in-depth look at my experience, please visit www.danielcornock.co.uk.

## PROJECTS

**Personal Portfolio**
Apr 2020 – Present

My developer portfolio and blog, featuring all of my work, blog posts and experience. Recently re-built for a cleaner UI. Available to view at www.danielcornock.co.uk.

Technologies: *HTML, SCSS, JavaScript, Jekyll, Netlify*

**PropertyRight**
Sep 2019 – Dec 2019

PropertyRight is a personal project of mine designed with Figma and built using the MEAN stack, that allows users to store information about their properties with to-do lists and tenants. Built as a SPA (Angular 8) and an API using NodeJS with TypeScript.

Technologies: *Angular 8, NodeJS, TypeScript, MongoDB, Express, HTML, SCSS*

## WORK

**MHR**
July 2019 – Present

**Junior Web Application Developer**
Developed features for People First, a HR SaaS solution. Working in an agile environment, I am responsible for development and testing front-end features primarily in the recruitment service, following clean coding principles and implementing solutions based on provided designs.

Technologies: *Angular 8, HTML, SCSS, Jasmine (unit testing), Azure Devops (agile)*

## EDUCATION

**University of B'ham**
Sep 2014 – July 2017

**BEng Computer Systems Engineering (2:1)**
Projects: *Line-following robot chicken, ALU (using assembly code), Phonebook (using C with linked lists), Visual Analytics final year project (using PowerBI, grade: $1^{st}$)*
